

Gentle Front-Support Baby Carrier

In the Media: Creative Child Award - June 2008

Creative Child
Helping Parents Nurture Their Child's Creativity

BELLE WINS CREATIVE CHILD SEAL OF EXCELLENCE AWARD!

Boulder, CO – The 2008 Creative Child Awards panel recently awarded the Belle Organic Moss Baby Carrier (MSRP \$99.95) a SEAL OF EXCELLENCE AWARD in the Baby Carrier category! Creative Child Magazine is a national publication that focuses on providing the latest information on products that assist in the nurturing of your baby.

The Seal of Excellence is a coveted award given to those products that exceed expectations based on the criteria for nurturing creativity and development in children. Belle Baby Carriers is honored to be selected as one of the winners by the panel of judges, among the 1,000+ applicants who submitted their products in this year's competition.

Designed and engineered by Seth Murray and Mark LeBeau, the Belle offers parents an innovative alternative to the traditional baby carrier. The Belle Baby Carrier uses a unique support system that places more than half of the baby's weight directly onto the waist belt.

The Belle Organic Moss carrier is made from 100% Organic hemp and cotton fabrics and is designed "to provide an opportunity for parents to support their babies with a carrier that is natural, and to take part in creating a healthier environment for our children to grow and develop" according to Murray.
