

Gentle Front-Support Baby Carrier

In the Media: Baby Luxe - Aug. 2008

Travel effortlessly with your little one
in the Belle Baby Carrier!

Seth and Mark, designers of the Belle Baby Carriers, converted their knowledge of rock climbing safety gear into a safe, functional, modern designed carrier. Made of 100% organic cotton and hemp material, environmentally friendly dyes, Environmental Resin waist belt ring pad, and recyclable packing; this product is making headlines all over the country! It has personally made our 10 week old happy as a clam! I never have to worry about him fussing in public again! He falls right to sleep in his Belle Baby Carrier! It's comfortable for him and me, beyond comfortable for him I would say since NOTHING puts him to sleep like this carrier!

The comfort of this carrier is simple, it distributes baby's weight to your hips instead of your back and shoulders. For a younger infant, the waist belt can be adjusted to carry baby lower, a perfect sleeping position for them. As baby grows and can hold his head up, this carrier is also made for the forward facing position. And a "luxe" favorite: chic and hip designs and colors! Including two new Fall styles, Cherry Deco and Organic Denim.
