Your one-stop-shoppe for everything you need when you're expecting - "must-have" products, expert advice on parenting, health, fitness, beauty - and more!

Parent Must-Have's

Dads design stylish & comfortable baby carrier: The Belle

Introducing the Belle Baby Carrier

A chic front-supported carrier for today's modern, active parent & their precious baby.

Designed by two fathers who engineer rock climbing safety equipment; the Belle is perfect for those wanting to wear their baby on a hike, and then stroll around town without having to sacrifice style and comfort for function.

Sewn in Colorado of only the highest quality fabrics, the Belle supports your baby in a natural, ergonomic position; and the sleek design makes it easy to use, and minimal to stash away. Our load distribution system displaces the baby's weight from the parent's shoulders, down to their hips, ensuring extended-wear comfort. The mother and baby are in constant contact so she is able to discretely nurse, and the baby can face towards or away.

Now available in two organic colors, Organic Sand and Organic Moss.

We have this posted due to popular demand by local Colorado parents that absolutely LOVE this product!!
